Client Clinic Instructions for: Seneca Lake Veterinary Care (SLVC)

- 1.) Client provides their own transportation to and from Seneca Lake Veterinary Care office located at: 105 Washington Street, Geneva, NY 14456 PHONE: 315-759-5825
- 2.) **Cost of clinic is \$80.00 for each cat. This is due at the time of drop off**, unless you have made prior arrangements with a member of The Colony Caregivers (TCC). If you have, please provide members name: _____ . You may leave a check at SLVCOffice payable to THECOLONY CARGEIVERS or pay SLVC directly by Cash or Credit Card on the morning of appointment.(direct payments are not tax deductible).
- 3.) Client to drop off cat(s) between 8:00:-8:30am on the scheduled date.
- 4.) Cat(s) are to have no food after 9:00PM the night before.
- 5.) Traps & carriers should be clean PRIOR to using them to bring a cat to clinic. Dirty equipment is not sanitary for either the cat(s) or humans. For truly feral cats, a trap is required. Those that are friendly may be brought in a carrier. One cat per trap or carrier. The cat(s) will return to the trap or carrier they arrived in. for special circumstances (i.e.2 cats caught in one trap), please contact the TCC representative that scheduled you for clinic.
- 6.) Cat(s) to be picked up no earlier than 4:00pm the same day. After 5:00PM, there will be an additional charge for late pick-up, as we close at 5 PM.
- 7.) Under special circumstances only (i.e.sick), a cat may be brought to the vet office the night before or stay after surgery until the next morning. PRIOR APPROVAL is needed by both SLVC and a Board Member of TCC.
- 8.) Elective procedures (i.e. declawing, etc.) will NOT be performed and is not part of clinic. If you have taken in a stray you intend to keep, a separate appointment must be made to address those issues. Most of the cats for clinic will be feral in nature. However, issues requiring medical treatment may be addressed at the same time. (i.e. eye infections, broken legs, etc.). TCC will not be responsible for the additional medical expenses, however, you will be entitled to a 25% discount.
- 9.) By completing this clinic form and presenting a cat(s) for clinic or any other medical treatment as arranged through or by TCC, I hereby agree to allow SLVC to release any/all information regarding said cat(s) to TCC, including but not limited to any medical treatment administered and any services provided. No owner information shall be released to the general public at anytime and shall be kept confidential by SLVC & TCC. In the event medical treatment is provided to the cat(s), you may be contacted by TCC at a later time for additional information as needed for maintaining organization records.
- 10.) Vaccination records will be provided. If addittional copy, needed later, there will be a fee. Ear tipping is optional at this clinic. However, it is highly recommended it be done if your cat(s) will be returning outside to allow easy identification of being neutered. Please be sure to make your selection on the **Clinic Admision Form SLVC-1** page1).
- 11.) What IS included in Clinic:
 - a.) Spay or Neuter Surgery under anesthesia
 - b.) One-Year Rabies Vaccination.
 - c.) First Distemper Vaccination .
 - d.) Pain medication, if deemed necessary by veterinarian doing the surgery.
 - e.) Revolution application for the treatment of fleas, ear mites & intestinal parasites
- 12.) What is NOT included in Clinic:
 - a.) Including but not limited to anything NOT listed above in #11.
 - b.) Combo Felv/FIV Test = \$38.00 (individual tests not offered at SLVC, 25% disc. will apply).
 - c.) Medical treatment not approved by a Board Member of TCC.
 - d.) Medications not listed above in #11.
 - e.) Additional office visits after Clinic.

By signing below, I acknowledge that I have read and understand these terms & agree to all.

Discharge Instructions
Seneca Lake Veterinary Care

- 1.) Cat(s) to be picked up at SLVC no earlier than 4:00pm the same day. Additional charge for late pick-up, as we close at 5:00PM.
- 2.) Cat(s) MUST not be released less than 24 hours after surgery. They must be kept in a warm place during the Winter, as their body temperatures are affected by anesthesia. It can drop as much as 10 degrees. In addition, even if the cat(s) no longer seem wobbly upon standing, they may still be under the effects of the anesthesia for many hours afterward and their judgment may still be impaired.
- 3.) Keep trap or carrier covered at ALL times. This helps GREATLY to keep them calm.
- 4.) Be sure cat(s) are not put in any area where they are still subject to predators, even while in the trap or carrier.
- 5.) Place the trap on top of a tarp, large piece of plastic or a garbage bag for cleanliness & ease of clean up.
- 6.) Traps & Carriers must be cleaned with a bleach & water solution. Be sure to rinse well after.
- 7.) Caring for a feral.....be careful! It is best to use a trap & trap divider for truly feral cats. This will allow you to use the divider to keep them confined to one end of the trap while you insert food & water dishes. This is also a good opportunity to add or replace any newspaper inside the trap to be used for urinating/defecating.
- 8.) Give water as soon as you arrive back at your destination and a small amount of food. Please feed soft, pate-only food (as opposed to shredded) or at least moisten their dry food for several days.
- 9.) Watch that he/she does not eat too fast and vomit, as this will cause pressure & pain to the surgery area. Use a divider to keep them confined to one end of the trap while you insert food & water dishes. Change or replace any newspaper inside the trap if dirty.
- 10.) If at all possible, release the cat(s) into a small confined area at first. Make sure they can walk before releasing them from the trap or carrier. This is to avoid them from injuring themselves. Climbing, running and play with other cats should be limited if possible for 24-48 hrs.
- 11.) Female cats have a tube inserted in their throat when put under anesthesia. You may hear a raspy sound and their throats may be sore for several days. Please feed soft, pate-only food or moisten their dry food for several days.
- 12.) Stitches dissolve on their own so there is no need for a follow-up appointment. If you observe any drainage from the incision site, please call SLVC 315-759-5825 Dr. Barbara Kaufman

Remember.....

Just like humans, the cat(s) are sensitive to fear, cold, heat & pain. Please be aware of this during trapping, transporting and care after surgery. Keeping the trap or carrier covered at ALL times is generally very helpful in keeping them calm, especially for a truly feral cat.

I have read, understand & agree to all of the items listed here.
